

PRO-D90 DEHUMIDIFIER

PRO-D90 – DEHUMIDIFIER

The Pro-D90 is a high-performance basement dehumidifier. Its compact design can be used in multiple applications to remove humidity in damp, cool spaces up to 2,600 square feet. While energy efficient, its high capacity moisture removal can remove up to 90 pints of water per day via a fixed drain.

HOW IT WORKS

- The electronic control board controls the desired relative room humidity
- Air passes through the system and comes into contact with a cooled surface
- Condensed drops of water form on the cooled surface
- The condensed drops collect and drain out through the drainage hose
- The air then passes through a warm exchange and returns to the room dehumidified

FEATURES

- Replaceable pre-filter
- Electronic circuit controls
- Automatic digital humidistat
- Control relative room humidity within 1%
- Low energy consumption
- Quiet operation
- Compact, low profile design
- Automatically restarts if power source is interrupted
- Sturdy, galvanized steel frame with carrying handles
- Hot gas defrost

SPECIFICATIONS

Power consumption	595 watts
Air Flow	310 CFM
Dimensions	13.8"W x 15.8"H x 24.8"D
Weight	78 lbs.
Warranty	5 Year Limited
